

Job Aid: Web Browsers Supported by Saba Cloud

Core Concepts

What web browsers are supported?

Saba Cloud supports the following web browsers and accompanying software.

Browser	Operating System	Java Runtime Environment	Adobe Flash Player
Apple Safari 6.0.x or later	Mac OSX 10.6.x	Any JRE supported by your Web browser that works with your Saba Publisher and third-party content	Version 9 or later
Microsoft Internet Explorer 11.x IE support status Saba is constantly evolving Saba Cloud and offering customers a streamlined, secure experience full of great features and functionality. As a cloud-based system, you access Saba via third-party browsers and the architecture of those browsers can support or limit what we can offer you. After careful consideration, and following Microsoft's lead, Saba has terminated support for IE7, IE8, IE9, and IE10 beginning with update 41. ➤ <i>Note: Using Microsoft Internet Explorer 11.x in compatibility mode is also not supported.</i>	Windows 7, Windows 8, Windows 10		
Microsoft Edge	Windows 10		
Mozilla Firefox (Latest available version)	Windows Vista SP1, Windows Vista SP2, Windows 7, Windows 8, Windows 10, Red Hat Enterprise Linux 6 plus the latest update, Red Hat Enterprise Linux 5 plus the latest update		
Google Chrome (Latest available version)			

Additional Information

- Saba Cloud does not support using the Back button in the browser to navigate to previously-visited pages. Due to differences in architecture, the Back button may work for some pages in some implementations, but this is not by design and Saba does not guarantee that it will work on any specific page of Saba Cloud due to variables in components. As such, Saba does not recommend using the Back button to navigate the product interface.
- Saba Cloud does not support multiple browser tabs.
- Saba recommends that users disable software that blocks pop-ups or ads while logged in to Saba Cloud. Such software could prevent some menus and controls from functioning properly.
