P2: Level Standards

GENERAL ROLE

This level is accountable for directly providing service to any assigned work unit at the University. The service can focus on a single or a variety of job functions with varying degrees of independence.

Incumbents:

- Put into effect what is required by defined job duties and responsibilities following professional norms or established procedures and protocols for guidance.
- Tend to have assignments that are reoccurring and work outputs generally are delivered in a prescribed form/format.
- Alter the order in which work or a procedure is performed to improve efficiency and effectiveness.
- May recommend or implement modifications to practices and procedures to improve efficiency and quality, directly affecting the specific office operation or departmental procedure or practice.

INDEPENDENCE AND DECISION-MAKING

⇒ Supervision Received
   - Works under general supervision.
   - Periodic checks on accuracy, quality, and timeliness of outcomes.

⇒ Context of Decisions
   - Independently develops how work is to be done based on precedent, practice, and existing policy at the unit/office levels.

⇒ Job Controls
   - Possess the latitude to adjust the work processes or methods to effectively and efficiently manage their work assignments.
   - Guided by general procedures and professional norms.
COMPLEXITY AND PROBLEM SOLVING

→ **Range of issues**
  - Problems tend to be modestly technical or operational.

→ **Course of Resolution**
  - Performs comparisons, verifications, reconciliations, compilations, etc. and such of data, program or student services/practices, or operational/staff output.
  - Understands the end product/outcome and where to send and receive information and materials to fulfill the assigned responsibilities.

→ **Measure of Creativity**
  - Once problems are identified, solutions generally can be resolved using conventional or standard procedures.
  - Most of the obstacles, issues, or concerns can be handled with established practice and policy.

COMMUNICATION EXPECTATIONS

→ **Manner of Delivery and Content**
  - Regularly provides information on finished materials to others.

SCOPE AND MEASURABLE EFFECT

- Actions typically affect an individual, item, event, or incident, etc.
- Actions taken are generally done to meet reporting requirements or regulatory guidelines, or to satisfy internal checks and balances and/or existing standards.
- Incumbents indirectly promote the general welfare of students, faculty and staff, and safeguard the institution by playing an important role within a process.

**Job Template**

**GENERAL SUMMARY**

Assists in the review of construction documents and work in the field in order to ensure compliance with the CT building and fire codes and statutes for all new, non-threshold construction and renovation of existing buildings. Serves as a secondary resource for building and fire code compliance for UConn project managers and outside contractors.

**REPORTING RELATIONSHIPS AND TEAMWORK**

Works under general supervision of a supervisor or manager.

**ESSENTIAL DUTIES AND RESPONSIBILITIES**

*The intent of this section is to list the primary, fundamental responsibilities of the job – that is, the duties that are central and vital to the role.*

- Regularly resolves routine building and fire code and statute issues, referring more complex issues to Building Inspector & Compliance Official or Supervisor.
- Aids in reviewing construction documents. Collaborates with Building Officials, project managers, and architects to ensure compliance with CT building and fire codes and statues.
- Working with a Building and Compliance official, advises design professionals, project managers, consultants, and contractors on the provisions of the building code. Provides guidance on design strategies to proactively achieve code compliance.
- Enforces the CT building codes and statues by performing field inspections of ongoing work and tracking routine, non-complaint issues through resolution; assists Building Inspection & Compliance Official with more complex and unique situations.
- Recommends sanctions for stopping work and project progress to Building Inspectional & Compliance Official when non-compliance or permit issues are identified.
- Determines necessity of design modifications in consultation with architects, project engineers, and construction personnel.
- Attends project meetings with UConn project managers and contractors. Provides advice on needed inspections based upon the current work being performed.
- Serves as a resource and provides general technical advice to University staff, construction personnel, and state officials regarding appropriate policies, fire safety standards, and state building codes.

- Keeps informed of changes and updates to state building codes, fire safety standards, and mandated building construction safety procedures and materials.
- Performs related work as required.

**MINIMUM QUALIFICATIONS**

- Possess and retain Assistant Building Official licensure from the State of Connecticut
- Four years of commercial construction experience, including one year as a licensed Assistant Building Official.

**OR**

- Possess and retain Assistant Building Official licensure from the State of Connecticut
- Associate degree or completion of technical courses in construction, building and/or fire codes or inspection principles.
- One year as a licensed Assistant Building Official.

**COMPETENCIES**

**Knowledge of:**

- The methods, materials, and equipment used in the building design and construction
- Building codes, fire safety standards, and major trade areas relative to building construction and maintenance
- Basic engineering and architectural principles
- Microsoft Office and related software applications

**Skill in:**

- Planning and organization
- Troubleshooting
- Developing and maintaining effective and appropriate working relationships
- Critical thinking, problem solving and analysis

**Ability to:**

- Interpret and apply building construction standards

P6: Level Standards

GENERAL ROLE

This level is accountable for serving in a highly advanced capacity in an area of specialization. The advanced resource capacity must be distinct from the regular or most common provision of work within the area of specialization. Positions are not reflective of the majority of the workforce, but instead the most advanced functions within an area of specialization.

Incumbents:

- Serve in a subject leader and consultative capacity within an area of expertise
- Set goals and objectives for team members to meet project initiatives and standards
- Distribute project work
- Evaluate and monitor the accuracy, quality, quantity, and timeliness to meet project milestones and objects

DECISION MAKING

→ Supervision Received
  - Works under direction
  - Seeks supervisory approvals when significant changes to process steps are considered and additional resources for task completion are required

→ Context of Decisions
  - Decisions are driven by departmental policy and procedures
  - Incumbents understand the smallest details of a circumscribed area

→ Job Controls
  - Freedom to plan and carry out all phases of work assignments, which include the oversight of project staff
  - Given the latitude to make daily operational project decisions

COMPLEXITY AND PROBLEM SOLVING

→ Range of issues
  - Issues are readily identified but cannot be understood and fixed in simple cause-effect terms
  - Variables affecting the problem are generally known

→ Course of Resolution
- Utilizing an understanding of best practices and the way similar units run elsewhere, convincingly recommends, develops, and implements capital and process improvements to the area

→ Measure of Creativity
- Problems require integrative solutions such as how technologies, processes, resources, and people all fit together

SCOPE AND MEASURABLE EFFECT
- Incumbents serve as a lead over major projects within a specific administrative/programmatic function or specialty area requiring specialized education
- Actions regularly affect a department or an office centric outcome with departmental impact
- Incumbents’ actions generally have a direct impact on controlling such things as nature of work and scope of services
- Incumbents’ actions may have high risk financial, compliance, political or safety implications
- Performance results tend to relate to efficiency, degree of waste/cost overruns, quality/continuous improvement, timeliness, resource allocation/effectiveness, etc.

Job Template

GENERAL SUMMARY

Manages one or several phases of capital project development, including planning, design and/or construction at the University. Ensures project scope, design, schedule, and budget are being adhered to and adjusted when necessary to meet University requirements for primarily small to mid-sized building, infrastructure, and site-improvement projects.

REPORTING RELATIONSHIPS AND TEAMWORK

Works under the direction of a Director in the capacity of planning, design, and/or construction for an area of specialization.

ESSENTIAL DUTIES AND RESPONSIBILITIES

*The intent of this section is to list the primary, fundamental responsibilities of the job – that is, the duties that are central and vital to the role.*

- Develops or monitors budgets based on project requirements, assisting with developing or monitoring capital budget requests for projects related to small and mid-sized renovations and new buildings, deferred maintenance, interior fit-outs, site work, and utility and/or infrastructure projects.
- Accountable for aspects of project management on small to mid-sized building, site, and utility renovations and/or installations during the planning, design, construction and/or turn-over phases of the project.
- Conducts and runs meetings with University stakeholders, internal department staff, and outsourced design and/or construction professionals for administered projects.
- Oversees the preparation of planning and/or design documents for the administered projects within the specialty area, especially when in the role of planning or design management.
- Coordinates and oversees contract administration and construction activity of small to mid-sized projects from pre-construction, through the bidding and procurement phase, to construction completion and acceptance, especially when in the role of construction management.
- Ensures code compliance and quality assurance of all assigned projects related to planning, design and/or construction management.
- Serves as a resource and project leader in matters regarding project scope, design, planning, budget, cost analysis, schedule and/or regulatory compliance issues.

- Monitors the quality of work, safety, budget and timely completion of construction projects, in accordance with University and department policies, procedures and priorities, especially when in the role of construction management.
- Facilitates necessary communication and coordinates with University departments to ensure uninterrupted continuity during all project phases on matters related to department-specific interests and scopes of responsibility (i.e. parking, police, environmental, etc.)
- Leads and directs the work and activities of any assigned staff.
- Conducts research and analysis to develop plans and technical reports, especially when in the role of planning or design management.
- Reviews and interprets technical, environmental, economic, and legal information if required by the assigned project, especially when in the role of design or construction management.
- Performs related work as required.

### MINIMUM QUALIFICATIONS

- Bachelor’s degree in related field.
- Eight years of related experience in planning, design, or construction management of small to mid-sized projects.
- Professional registration and/or required licenses and/or certifications in the appropriate discipline may be required.

### COMPETENCIES

#### Knowledge of:

- Architectural services, landscape architecture and/or utility engineering
- Mechanical, Electrical, Plumbing and Fire Protection engineering in buildings and infrastructure systems
- Project management during planning, design, or construction phases of projects
- Building and professional codes
- Microsoft Office and related software applications

#### Skill in:

- Planning and organization
- Troubleshooting
Developing and maintaining effective and appropriate working relationships

Critical thinking, problem solving and analysis

Ability to:

- Maintain records and produce complex reports
- Oversee the design and interpret blueprints and specifications
- Communicate effectively through both oral and written means
- Respect diversity and work collaboratively with individuals of diverse cultural, social and educational backgrounds
- Understand project design documents, specifications, details, and shop drawings
- Maintain the confidentiality of information and professional boundaries
- Work independently to analyze available information, draw conclusions and understandings, and present such conclusions effectively to senior management

P7: Level Standards

GENERAL ROLE

This level is accountable for serving in an expert resource capacity in an area of specialization. These positions are not reflective of the majority of the workforce, but instead the most complex functions within an area of specialization.

Incumbents:

- Serve in a subject leader and consultative capacity within an area of expertise
- Provide analytical, technical, and advisory support to leaders and decisions makers within the same disciplinary track
- Lead projects or initiatives within the specific area of expertise, to include leading vendors or cross functional departments or teams
- Research and apply better ways to effectively achieve end results by, for example, arranging/re-arranging the way work is performed, changing elements of processes, and adding or deleting new or unnecessary capabilities/functionalities as needed
- Set project objectives, immediate and/or long term, as a means to fulfill project initiatives

DECISION MAKING

→ Supervision Received
  - Works under general direction
  - Seeks assistance only when unique situations arise, coupled with financial impact to the division and political consequence

→ Context of Decisions
  - Work is focused on and regulated by specific department/division goals and milestones

→ Job Controls
  - Generally can act based on own judgement as long as actions adhere to division policies and operating procedures, and remain focused on the department and division objectives and missions
  - Subject to supervisory controls through conferences, review of reports, and occasional on-site visits or check-ins
• Supervisory controls are exercised on the incumbent for matters of intermediate and long-range planning, budgetary and human resources based matters

COMPLEXITY AND PROBLEM SOLVING

→ Range of issues
  • Problems are unique and unexpected
  • Challenges for problems arise due to lack of precedent

→ Course of Resolution
  • Problems require response/adaptation to changing conditions or circumstances, necessitating enterprise and new approaches with broad impacting effects
  • Problem resolution should regularly require collaboration and coordination with units internal to the division, with occasional collaboration and coordination outside the division

→ Measure of Creativity
  • Incumbents are regularly required to develop new methods/methodology for evaluation and implementation plans for new initiatives

COMMUNICATION EXPECTATIONS

→ Manner of Delivery and Content
  • Deliver statements and information in a combined persuasive and motivational fashion to subordinate staff, Departmental and University administrators, and the campus community as a whole

SCOPE AND MEASURABLE EFFECT

• Incumbents serve as an expert on specific subject matter evidenced by regularly researching and producing reports (e.g., white papers) on technical matters of systematic importance and consulting with managers throughout the Division/University on specific issues in the position’s area of expertise
• Actions regularly affect a departmental outcome with division wide impact
